20 November 2015

To coincide with World Antibiotic Awareness Week, HEE is pleased to announce the launch of its latest e-learning programme on Antimicrobial Resistance [7]. The introductory level programme has been designed to support all health and social care staff – both clinical and non-clinical – in a variety of settings to understand the threats posed by antimicrobial resistance, and ways they can help to tackle this major health issue.

The module was designed by specialist antimicrobial pharmacist Dr Diane Ashiru-Oredope and is free to access. It takes about 25 minutes to complete.

## Reducing antimicrobial resistance [7]

The Antimicrobial Resistance programme has been designed to support all health and social care staff
