Ten Training Hubs have been commissioned covering a large proportion of the west midlands, with potential to expand all west midlands CCG areas.

Training Hubs work to increase the undergraduate student placements in Primary Care in collaboration with HEE, HEIs and general practices across the West Midlands region.

Training Hubs present an exciting opportunity for general practices and other primary care providers to work in a supported network. We are aiming to build capacity for education delivery in primary care and increase the number of undergraduate students and learners in primary care and out of hospital settings. This has been shown to have a positive impact on people choosing a career in those settings.
