Recent healthcare policy is driving the need for greater MDT working. The Long Term Plan [7] set out an ambition to break down traditional barriers between teams and organisations to better support the increasing number of people with long-term health conditions, and this became a key commitment in *We are the NHS: People Plan 2020/21*. Whilst there is lots of evidence already published, this is often sector or setting specific. This **multi-disciplinary team toolkit** [LINK TO FOLLOW] is intended to collate all the evidence base into a single, whole system, step by step guide to support acceleration of MDT working within health and care organisations and ICSSs.
