

Stakeholder Briefing – Issue 10

Key Messages and links to 17th June 2020

Welcome to Health Education England's weekly stakeholder bulletin.

In this bulletin we will provide:

- Weekly message from Interim Chief Executive, Professor Wendy Reid
- Overview of HEE education and training news, and our continued response to COVID-19
- An update from your regional office

Weekly message from Interim Chief Executive, Professor Wendy Reid –

To safeguard our future workforce supply, we need to minimise disruption to training and get it back on track. [Read the full message here.](#)

We are supporting all professions to rapidly grow to meet the needs of patients by:

ARCP webinar

On 3 June, we hosted a webinar for medical trainees on ARCPs. The recording of the webinar is now available on the [HEE YouTube channel](#).

Student Placements - We would like to thank all those students who were able to come forward to support the NHS at this challenging time. It has been hugely appreciated. To be clear it is absolutely untrue to suggest that student nurses and midwives are being made redundant, all student nurses and midwives are required to complete placements during their training. These placements are normally unpaid but to recognise the special circumstances and as part of the response to Covid-19 these hours have been paid and will be until the end of summer. NHS England has been provided with the funding for student salaries as part of the response to Covid.

Year 3 students will be paid till 31st of July and if they have completed hours and assessments can qualify and be paid as full registered nurses. They will move from Band 4 to Band 5 and therefore increase their pay. Any Year 3 student who has hours to complete will be paid until September to allow them to do this. Any year 2 students on placement till July 31st will be paid and after this normal non-paid placements will be re-introduced along with Year 1 students. We committed at the outset of the pandemic to ensure that these students complete their training and are able to qualify. It was always made clear to students who opted into paid placements the arrangements would need to come to an end at an appropriate point so that students could return to their supernumerary status to complete their registered

nursing qualifications as quickly as possible to permanently enter the NHS workforce.

It was agreed by all partners, including the Nursing and Midwifery Council (NMC) and Council of Deans (CoD) and unions, to support these arrangements. This means any final year student who has been working in the NHS will receive funding until they complete their programme and then they will be able to register with the NMC and apply for a permanent role as a registered Nurse.

We are ensuring core HEE work to support our NHS colleagues continues:

Choose GP

The next round of GP specialty training applications opens from 28 July – 13 August (for a February 2021 start).

Follow 'Choose GP' on [Facebook](#) or find case studies, FAQs and career information on the [GP National Recruitment Office \(GP NRO\) website](#).

Enhancing Junior Doctors' Working Lives – update report 2020

At a time of challenging service and workforce pressures, HEE has remained committed to supporting junior doctors. COVID-19 has impacted all of us in ways we could have never imagined but has shown more than ever that the strength of the NHS is its workforce, which has shown incredible depth of compassion, strength, and adaptability.

The [Enhancing Junior Doctors' Working Lives progress report 2020](#) provides an update on achievements over the past year.

Health Education England

This year's Enhancing Junior Doctors' Working Lives report 2020

- Expanded the **Less Than Full Time training pilot** to all junior doctors in Paediatrics and in Obstetrics & Gynaecology.
- Working with the Royal College of Physicians, commenced recruitment for the second cohort of **Flexible Portfolio Training**.
- Pilots for **Out of Programme Pause** went live in selected specialties across four local office sites.
- The **Supported Return to Training (SuppoRTT)** programme has become an integral part of HEE core services.
- The first-year evaluation report showed that over 750 junior doctors accessed **SuppoRTT** during a 6-month period.
- **Foundation Priority Programmes** introduced to attract and support doctors in under-doctored geographies and shortage specialty areas. The first cohort of foundation junior doctors will begin in post in August 2020.

We are making sure all professions have the training they need to make a difference:

e-Learning for Healthcare - The e-LfH COVID-19 programme has now seen 1.45m session launches since it went live in March 2020. The programme is free to access and the requirement to register has been removed to make it as easy as possible for the health and care workforce to access the range of resources to support them responding to the pandemic. For more information please visit: <https://www.e-lfh.org.uk/coronavirus/>

Learning Hub live - how it can help you share and collaborate

The Learning Hub is a new digital platform, developed by Health Education England, that provides easy access to a wide range of resources that are pertinent to education and training in health and care. New features will be frequently released to provide a comprehensive learning experience for users.

Since the launch of the Learning Hub at the end of May 2020, there have been over 500 learning resources contributed by stakeholders on the platform. Resources have been contributed by medical schools, operational delivery networks, training hubs, clinical commissioning groups, professional bodies, simulation networks, charities and social care organisations. These contributions offer and support a wide range of training delivery from videos and webinar recordings, e-learning, slide presentations, Q&A packs, simulation scripts, lesson plans to web links.

Read our latest [case study from the London Training Hubs](#) on how the Learning Hub is helping them to share resources and work collaboratively across primary, secondary and social care.

If your organisation has resources you wish to share and contribute to the platform please email enquiries@learninghub.nhs.uk.

You can sign in to the Learning Hub (<https://learninghub.nhs.uk>) either using your e-Learning for Healthcare Hub username and password or by creating an account on the Learning Hub and using those details.

For more information about the Learning Hub follow us on Twitter: @HEE_TEL, visit: telblog.hee.nhs.uk to read blogs about our journey so far or visit: www.hee.nhs.uk/tel.

Supporting the well-being of the health and care workforce –

Survey of students and learners exploring impact of Covid-19 - HEE's RePAIR (Reducing Pre-registration Attrition and Improving Retention) team is exploring the impact of changes to education-provision as a result of Covid-19 on attrition and retention of students and learners. The first step of this work is a survey, which is being supported by the national quality team, and uses questions drawn from previous National Education and Training Survey and RePAIR surveys. This launched on 1 June and has gone out to all student nurses, midwives, AHPs, medical and dental students and physicians associates, and undergraduate students studying the health care sciences. Foundation in year 1 doctors are also asked to complete the survey.

11,807 responses have been received so far. We ask that all learners are encouraged to participate until the closing date on 30 June 2020.

REGIONAL UPDATE

[Professional Support and Well-being Service \(PSW\)](#)

The PSW are continuing to accept self-referrals from Trainees, Consultants, LEDs and SAS doctors. In order to access psychological or any other support, you can refer yourself through our dedicated generic inbox COVID19-PSW.EoE@hee.nhs.uk. Below is a reminder of the services the PSW can offer:

Psychological Support	Communication Skills Support
Exam Support	Emotional Intelligence Testing
Resilience Support & Feedback	Neuro-diverse Screening & Support
General Well-being	Occupational Health
Careers Support	Support for Educators

We have successfully run two out of six virtual communication skills courses and will be rolling out new dates in the coming months. In the next few weeks, we will be releasing dates for a virtual exam support workshop. We would welcome any trainee who is currently accessing our services for Exam Support to contact us if they would like to be considered for a place. Further information will follow shortly.

The PSW remain keen to hear from any programme wishing to set up a mentoring scheme and may require support from us. Please get in touch at:

mentoring.eoe@hee.nhs.uk

Study Leave

We recognise that many courses/conferences will not be going ahead or cannot be attended as study leave time may need to be cancelled. Trainees have been assured that they will still be able to reclaim expenses if these cannot be refunded by the provider. Trainees should try to reclaim their course/conference fees and any other fees (e.g. pre-booked travel) in the first instance from the provider, should this not be possible evidence of non-refundable expenses should be included with study leave claims.

Moving forward, HEE EoE would like to support appropriate study leave applications for courses/conferences, including those that are taking place virtually. Study leave time and funding can be taken for virtual courses if the time off can be accommodated by the employing Trust and the application has followed the usual approval process.

[Bursaries for PGCert and PGDip in Medical Education](#)

Application and candidate specification can be found here:

<https://heeo.ee.hee.nhs.uk/faculty/bursary-funding>

The applications deadline is **1 July 2020**.

Interested applicants should send their queries to tefunding.eoe@hee.nhs.uk

[Supported Return to Training \(SuppoRTT\)](#)

Trainees who have been shielding as a result of the Covid-19 pandemic are welcomed to access the SuppoRTT services available for trainees; this is offered to all trainees who have taken a period of approximately three months or more out of training. For more information, please visit the SuppoRTT pages of the Health Education England, East of England website.

In the first instance trainees will need to meet with their TPD (or College Tutor in Paediatrics and O&G) to complete the SuppoRTT plan part 1 until 'Reason for time out of training' and Part 2 of the plan: <https://heeo.ee.hee.nhs.uk/psw/supported-return-training>.

Trainees should contact SuppoRTT.eoe@hee.nhs.uk for any queries.

[OOP/OOPR](#)

OOP – We are processing applications in the usual way and details of the process can be found here <https://heeo.ee.hee.nhs.uk/faculty-educators/out-programme-oop>.

OOPR – For trainees currently OOP doing research, they will have lost research time due to the need to return to clinical work during the pandemic. HEE is committed to trying to allow additional research time to make up for this. Trainees have been made aware that this will require discussion with research leads, TPD and the funding organisation.

We will not be able to support extensions to OOP(T) or OOP(E) at this time.

FURTHER INFORMATION

By following @NHS_HealthEdEng you can keep up to date with new information and resources as they are published. Most importantly are the notifications of webinars being broadcast during the week.

Right now, making sure we are communicating properly is obviously incredibly important. If there's any information you think is missing on [HEE's webpages](#), please let us know by submitting your question to the [HEE Q&A helpdesk](#).
