

The NHS Digital Academy

The NHS Digital Academy is our home for digital learning and development, set up to increase the digital skills of our workforce and to support a new generation of digital leaders who can drive the transformation of health and social care.

700+ digital change leaders undertaken focused development programmes, including:

- **500** people over five cohorts of the Digital Health Leadership Programme, with Imperial College London.
- **100** Topol Digital Fellows over three Cohorts, providing time and funding for digital innovation projects.
- **Two** cohorts of the Digital Futures programme provided team-based learning for **60** ICS leaders across health, education and social care/local government.
- **20** delegates currently piloting the Health Innovation Placement programme, run in parallel with the Clinical Entrepreneurs programme and including exposure to digital startups in industry.
- **30** funded Florence Nightingale Foundation Digital Scholarship places for nurses and midwives.

Digital Board development sessions

Embedding digital skills and awareness across our board level senior leaders, including for Trusts and ICBs - engaged over **1,700** board members across around **200** Trusts.

Promoting digital learning and development across all regions

Supporting the setup of **eight** Informatics and Digital Health Skills Development Networks, across all regions in England, with a national council.
