

Health Education England – north east Clinical Fellow Scheme 2017/2018

Number of posts: 3 in total (ST1-ST8)
(Entry level will be dependent on successful candidates experience)

To commence: 2nd August 2017

Duration: 12 months

Health Education England – north east and north Cumbria, working in partnership with the Faculty of Medical Leadership and Management (FMLM) and the North East's Lead Employer Trust (NE LET) have developed a clinical fellow scheme. This is an exciting development, and is an ideal time to get involved and build on the success of the first cohort of fellows.

The north east and north Cumbria has high standards of Postgraduate Medical Training, as defined by trainee feedback and results of the GMC survey and is committed to enhancing the training and educational experiences available for junior doctors.

Clinical Fellows will work in an apprenticeship model to the Postgraduate Dean and other senior personnel across the region. The scheme will offer experience and opportunity to develop a range of skills whilst managing or participating in key work streams including: recruitment, trainee engagement, policy development, international schemes, professionalism and teaching and quality improvement.

Successful candidates will be given a comprehensive induction programme which aims to prepare fellows for their year ahead. In addition to the induction programme, there will be the opportunity to attend development sessions and master classes delivered by North East Leadership Academy. Clinical Fellows will also be encouraged to work collaboratively on projects with colleagues throughout the region and nationally and to share learning with other regions and organisations.
