

Internships

BB A pre-masters clinical research taster BB

These awards have been designed to offer an introduction for graduates to all aspects of clinical research from trial design and data management through to undertaking primary research in a clinical environment.

Internships:

- provide backfill support for the intern's time;
- are available annually and run for six months;
- provide a range of taught and academically supervised interventions;
- allow the possibility for interns to undertake a research project supported by an expert clinical academic supervisor.

The Internship Scheme is managed by Health Education England's local teams, to whom enquiries and applications should be directed.

Further information and contact details are available on the HEE website:
