

Sports Medicine

How sports fellowship improves patient care & efficiency in the ED

Benefits

- SEM Drs can help address physical inactivity and deliver care by working with other specialities in multidisciplinary teams providing added value and significant cost savings and improve productivity.
- Investing in supporting post graduate qualifications is a cheaper alternative to short term locums and makes the individual feel further valued.
- Using existing resources more effectively to reduce rates of emergency admissions and lengths of stay.

SEM Dr's are;

“As demonstrated below, our SEM fellows have significantly outperformed their colleagues in their rate of treating undifferentiated emergency department cases, justifying the investment in their training and education. They provide excellent emergency care and are integral to our emergency care multidisciplinary workforce”

Number of Patients seen in one hour by grade.

“The clinical fellow post offered me the chance to get more clinical experience after foundation programme.

I had protected time to study sports medicine and the opportunity to do the sports and exercise medical diploma.”

Elizabeth Gaskin, CTI ACCS
