NHS Health Education England

North East & Yorkshire Regional Delivery Plan 2022/23

1. Introduction from the Regional Director

Health Education England (HEE) is part of the NHS, and we work with partners to plan, recruit, educate and train the health and care workforce. HEE's long term goals are to:

- reform clinical education to produce the highest quality new clinical professionals in the right number.
- transform today's workforce to work in a cooperative, flexible, multi-professional, digitally enabled system; and
- deliver and quality assure with partners education and training that is rigorous, highly sought after and future focused.

This is HEE's 2022/23 regional delivery plan for the North East and Yorkshire (NEY). It is a public and partner-facing document which summarises what we plan to deliver, independently or with partners, in the coming year and how this contributes to our long-term goals above and to NHS-wide people-related priorities and, critically, how this supports the aims of our region's Integrated Care Systems (ICSs).

We deliver core services for our ICSs, including planning, management and assurance of postgraduate medical, dental and pharmacy education, quality assurance across all forms of medical and clinical training, and the commissioning and contract management of education and training for a range of clinical roles. (Our commissioned programme for clinical education is known as our Multi-Professional Education and Training Investment Plan (METIP) and is included in summary at the end of this document.)

We work with partners to plan, design and deliver activities that support the recovery, growth and transformation of the NEY health and care workforce. We approach this transformation-focused work using a programme and project structure aligned to the NHS Long Term Plan and government priorities, and this year we have designed some of these programmes jointly with our colleagues in NHS England and Improvement (NHSE/I).

We enable ICS and wider regional programme-focused strategy in three key ways. Our Enabling Workforce Transformation programme leverages HEE's workforce planning, workforce intelligence and change management capability to support transformational change at place and in strategic programmes. Our Widening Access and Education Reform programme centres our work on implementing new roles, spanning the advanced practice to apprenticeships. And our regional Best Place to Work internal OD programme ensures that as a whole HEE team we are working impactfully and with a future focus, in line with our corporate values.

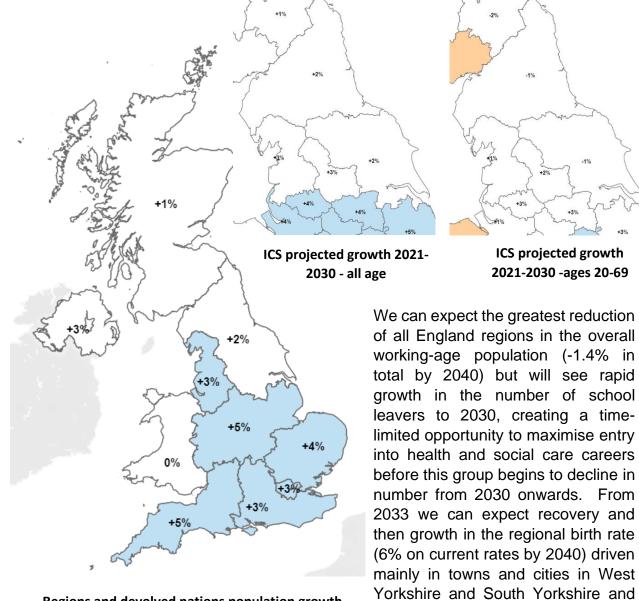

My team and I look forward to working with you in the coming year.

Mike Curtis, Regional Director mike.curtis@hee.nhs.uk

April 2022

2. About the region and its workforce

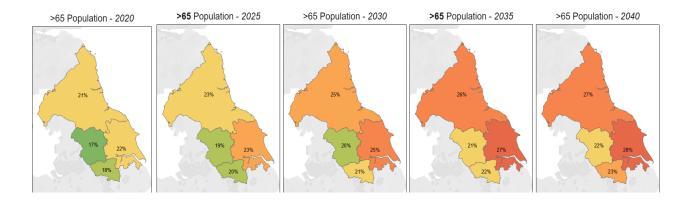

The North East and Yorkshire is home to nearly 8.7m people in 2021 – the fourth largest English region by population (after London, the South East and East of England), but the slowest growing, projecting only 2% growth by 2030. Growth is unevenly distributed across our Integrated Care Systems: 3-4% projected population growth by 2030 in West Yorkshire and South Yorkshire and Bassetlaw is offset by only 1.5% projected growth in both the North East and North Cumbria and in Humber and North Yorkshire.

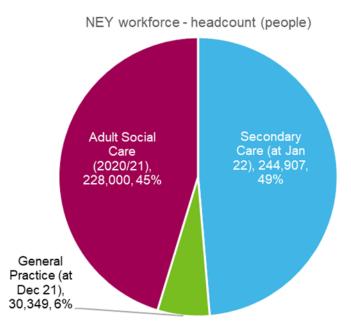

Regions and devolved nations population growth 2021-2030 - all age

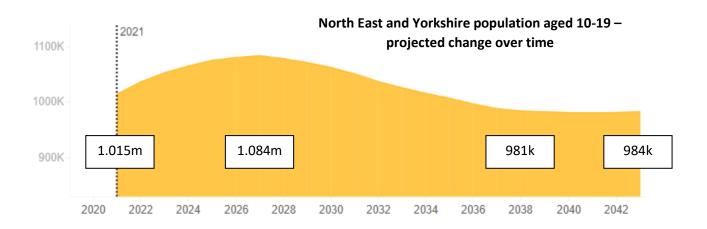

increases in demand for health and social care services.

Bassetlaw, with only modest growth in the other two ICSs by 2040. The challenges posed by these future workforce market conditions are made all the greater by an overall ageing demographic and significant deprivation in parts of our region. By 2040, one in four residents will be over 65, compared to one in five at present, with an even steeper growth in the 85+ population likely to drive continued

In 2022¹, over 467,000 people are part of our health and care workforce, working in a huge variety of roles to deliver compassionate and inclusive social care, secondary primary care and care They are trained by an expert services. network of educators, including 14 higher education institutions based in the region and a further 9 out of region, by health and social care providers who deliver student placements, essential formal and informal training and professional development alongside service, and of course, by our region's schools and colleges whose role in preparing and encouraging school leavers to pursue health and care careers which is critical to meeting the future challenges we face.

¹ Social care figures for 2020/21 (latest available); primary care at Dec 2021; secondary care at Jan 2022

3. About Health Education England

The Care Act 2014 sets out HEE's remit and range of roles and responsibilities in detail, including its duty to ensure an effective system for education and training for the NHS and public health.

Our relationship with Integrated Care Systems

We work very closely with the region's emerging Integrated Care Boards (ICBs) and their health and care partners to plan for and deliver the health and care workforce. In the North East and Yorkshire region, HEE delivers six externally facing functions. The table below shows how HEE functions are organised and how they work with ICBs. This includes some roles within our regional Transformation, Delivery and Performance function which are embedded in and work directly with our emerging ICBs. You can read more about our regional operating model for 2022/23 in our separate report on Supporting Integrated Care Partnerships <u>here</u>.

Our relationship with learners

HEE develops the pipeline of learners for the future NHS workforce working with a range of key partner organisations including NHS trusts, GP surgeries, voluntary and private providers as well as universities, royal colleges, and professional regulators. The table below summarises the role HEE directly plays in the education journey for core groups into four categories:

- i. Workforce planning which covers all workforce groups.
- ii. Education support applies mainly to postgraduate learners where HEE has a direct 'hands on' role in their educational progression and promotes educational reform and new ways of working across all professions.
- iii. Placement management applies to all learners, including securing sufficient placements in a clinical learning environment of good quality.
- iv. Financial support different groups of learners receive different levels of financial support.

| | Workforce Planning and Design | | Education | n Support | | Place | nent Manage | ement | Financial S | upport |
|-------------------------------------|-------------------------------------|-------------|---|--------------|----------------------------------|---------------------|----------------------|----------------------|----------------------|---------|

| Undergraduate doctors | Yes | | | | | Yes | Yes | Yes | | |
| Undergraduate nurses and AHPs | Yes | | | | | Yes | Yes | Yes | Limited (bursary) | |
| Commissioned clinical roles | Yes | | | | | Yes | Yes | Yes | Yes | Yes |

Our relationship with other regional partners

By March 2023, the Secretary of State for Health and Social Care intends to have created a new NHS England organisation, which will incorporate the responsibilities currently held separately by HEE. NHSE/I, NHS Digital and NHSX. We already work collaboratively with ALB partners across the people and workforce agendas, including through our joint governance structures led by the Regional People Board, and we will be working together through 2022/23 to build on these links and maximise the benefits of the new arrangements for our Systems and populations.

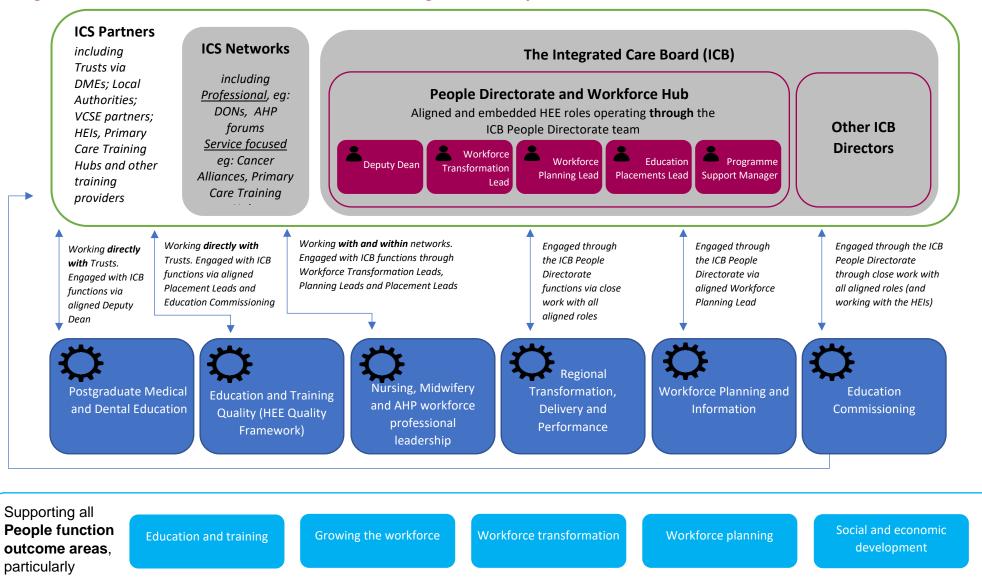

Figure X: Where HEE functions connect with the integrated care system in North East and Yorkshire

In addition to the functions above please note the essential contribution of the HEE Finance, Regional Business Management, and Communications teams and all the enabling functions, which supports all our externally-facing functions and aligned roles to operate safely, effectively and as a coherent regional team.

5. About this plan

HEE has three long-term goals:

Future Workforce: To reform clinical education to produce the highest quality new clinical professionals ever in the right number

Current Workforce: To transform today's workforce to work in a cooperative, flexible, multi-professional, digitally enabled system.

Quality: To assure and deliver with partners quality education and training that is rigorous, highly sought after and future focused.

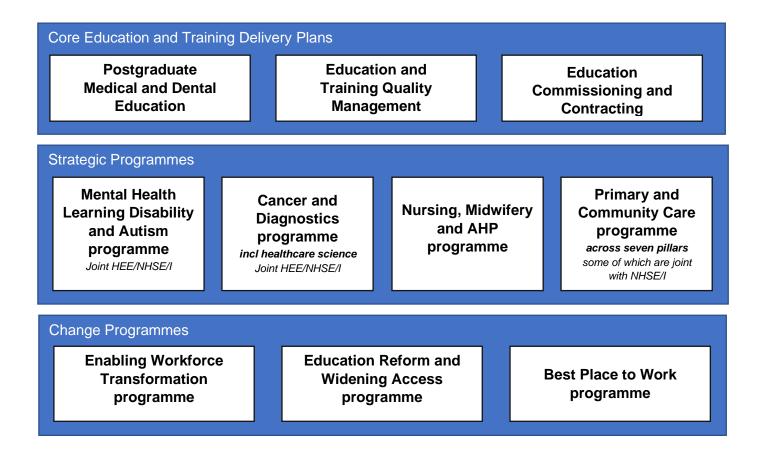

For 2022/23, the organisation has defined 12 objectives which will contribute to our overarching goals:

| Future Workforce | Current Workforce | Quality |
|---|--|---|
| Deliver domestic education and training supply and expand placement capacity | Support Integrated Care Systems with developing new ways of working and workforce redesign | Embed the new Quality Strategy and Framework to drive a consistent approach to quality assurance and improvement |
| Complete the long-term strategic framework and develop a more integrated approach to workforce planning | Adapt education and training to accommodate advances in technology and support the workforce to become digitally competent and confident | Enhance the quality and safety of maternity services by delivering the planned future workforce and ensuring the quality of training |
| Continue to deliver the Long-Term Plan and Manifesto commitments, particularly in relation to: - Primary and Community Care - Mental Health, Learning Disability and Autism - Nursing, Midwifery and AHP - Cancer and Diagnostics | Through the HEE Centre for Advancing Practice expand clinical practice opportunities to build multi- disciplinary teams and a more flexible workforce | Ensure the learner voice is heard and acted upon by using data and insight to measure, monitor and improve the quality of the learner experience |
| Deliver education reform that improves flexibility of training and facilitates multi- professional teams | Continue to strengthen the training, learning and development available to volunteers, carers and their families | |

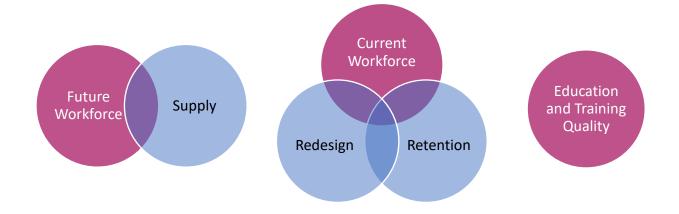

You will shortly be able to read about HEE's corporate goals and national delivery for 2022/23 in our corporate business plan at www.hee.nhs.uk

In the North East and Yorkshire, our HEE functions will work together to deliver these objectives in a way that is tailored to the needs of our emerging Integrated Care Boards and Partnerships. This delivery plan describes:

- how we will deliver three core services
- how we will contribute to the design and delivery of four key strategic programmes aligned to the NHS Long Term Plan
- how we will support system change in three enabling domains.

HEE's goals relate to (but are not the same as) the three-part structure of delivery emerging from NHS England/Improvement nationally:

We want our delivery plan to speak to the interests of all of our stakeholders, internal and external. We have therefore adopted a structure that reflects these different and shared planning lenses:

Our Strategic Programmes are structured using a blend of HEE and NHSE/I planning domains:

- Future Workforce: Supply
- Current Workforce: Redesign
- Current Workforce: Retention (considering all levers, including health and wellbeing, EDI, wider HR / OD interventions and leadership)

Our Core Delivery Plans and Change Programmes have adopted a planning structure specific to their own objectives and content. Our NEY response to HEE's long-term goal related to education and training quality is expressed in a standalone Core Delivery Plan and contributes across all the above domains.

Contact us:

Contact details for our strategic and change programmes are provided in the summaries that follow. General comments or queries on this plan, its format and our progress can be directed to: Rachel Baillie Smith, Director of Delivery and Performance, <u>rachel.bailliesmith@hee.nhs.uk</u>

Part A: Core Education and Training Delivery Plans

Post-Graduate Medical and Dental Education

| Service team | |
|--------------|--|
| Postgraduate | Prof. Namita Kumar (NK), Namita.Kumar@hee.nhs.uk, Regional Postgraduate Dean |
| Dean | (NEY) and Local Postgraduate Dean (NE) |
| Senior staff | Dr Jon Cooper, Local Postgraduate Dean, YH |
| team | Becky Travis, Head of Function for Training Programme Management (TPM), YH |
| | Gemma Crackett, Head of Function for Training Programme Management (TPM), NE |

Service objectives

HEE is responsible for delivery of PGMDE in England, committed to maximising the opportunities available to them throughout their training. Managing the delivery of Postgraduate Medical and Dental Training is the responsibility of HEE Postgraduate Deans who have statutory duties in addition to ensuring this training occurs to regulator standards. HEE is also committed to improving and reforming PGMDE for the benefit of patients and doctors in training. In the North East and Yorkshire, we will support, at any one time, around 7,900 medical and dental trainees in 2022/23, who are part of our total (approximately) 20,000 WTE strong medical and dental workforce region wide.

| S | ervice plan 202 | 2/23 | | | |
|---|--|--|------|--|--|
| | Workstream | Workstreams and Business as Usual Activities | Lead | Key partners | Timeframe |
| 1 | Deliver HEE PGDME statutory obligations | Ensure sign off for trainees achieving Full Registration and CCT (Certificate of Completion of Training) Revalidation for doctors in training | NK | General Medical Council Local Education Providers Employers (including Lead Employers) Royal Colleges | BAU as per continuous training cycles linked to each trainee's Annual Review of Competency Progression (ARCP) |
| | | Management of extensions in context of ongoing Covid recovery and Management of Education Support Budgets | | | |
| 2 | Recruitment, | Manage legal cases | NK | HEE's solicitors | As required |
| | delivery and assessment of PGDME | Develop and implement strategies to support trainee retention post completion | | Local Medical Schools Local Education Providers Employers (including Lead Employers) | As per recruitment cycles |
| 3 | Medical Education Reform | Develop and implement strategies to enable distribution of medical trainees across specialisms to support nationally defined expansion priorities | NK | Local Education Providers | Across 22/23 as per national timelines |
| 4 | Dental Education Reform | Complete Advancing Dental Care Programme and implement dental education reform model | NK | Local Education Providers General Dental Council NHS E/I | Across 22/23 as per ADC report roll out |
| 5 | Strategy | Support generalist agenda, continuing generalist school establishment in N Cumbria and N Lincolnshire and Hull | NK | Local Education Providers System partners as specific to local models | Across 22/23 |

Education and Training Quality Management

| Service team | |
|--------------|--|
| Postgraduate | Prof. Namita Kumar (NK), Namita.Kumar@hee.nhs.uk, Regional Postgraduate Dean |
| Dean | (NEY) and Local Postgraduate Dean (NE) |
| Senior staff | Dr Jon Cooper, Local Postgraduate Dean |
| team | Mr Pete Blakeman, NE Deputy Postgraduate Dean and Director of Clinical Quality |
| | Jon Hossain, YH Deputy Dean, Clinical Lead for Quality |
| | Julie Platts, North East and Yorkshire Senior Quality Lead |

Service objectives

The North East and Yorkshire Quality Team's function is to apply the multi-professional HEE Quality Strategy and Framework across the region, ensuring continuous quality improvement in line with our corporate foundations for success. This Multi-professional framework enables us to support our system partners, education, and placement providers by delivering a whole workforce quality perspective. The team is focused on:

- Supporting the 11 multi-professional workforce and HEE professional leads to ensure quality risks and concerns for all professional groups are understood, information is shared, and we work together to identify and deliver solutions.
- Continuing to work closely with all our stakeholders in Provider organisations and HEIs to proactively collate intelligence on known quality of education and training concerns and share at the ICS System Quality Groups.
- Supporting placement and education providers in escalating quality concerns and monitoring improvement action plans.
- Embedding the policy for the escalation of concerns, linked to the Intensive Support Framework and the Quality Improvement Register.

National Quality Team Key Performance indicator metrics are approved at the Quality Scrutiny Forum, Health Education England's Deans' Forum and in collaboration with HEE's Performance Delivery Team to ensure they are in line with the HEE Business Plan Key Business Questions. The North East and Yorkshire Quality Teams deliver against these KPIs at a regional and local level and compliance is reported nationally to the newly established Quality Committee.

| W | /orkstreams ar | nd Projects 2022/23 | | | | |
|---|--|---|-------|--|---|--|

| tahmima.tahir@nhs.net | | | | | |
| Lucy Firth, Senior Workforce Transformation Manager, NHSE/I | | | | | |
| | | | | | |

Programme objectives

This joint programme covers national programme requirements and regional programme priorities. Our overarching objective is to support NEY Systems to address recovery challenges in diagnostics and move towards delivery of the LTP ambitions for cancer:

- by 2028, 55,000 more people each year will survive their cancer for five years or more;
- and by 2028, 75% of people with cancer will be diagnosed at an early stage (stage one or two).

Working with the Cancer Alliances and the Cancer Networks and aligned with ICB priorities, the regional ALB joint team innovates, plans, commissions and facilitates training which enables Systems and providers to deliver service transformation, restoration and recovery, for example through the establishment of new models of service such as Community Diagnostic Hubs. As well as delivering growth in capability and capacity in core roles, we are supporting innovative redesign in both workforce deployment and the associated education and training. This includes ensuring an effective relationship between workforce redesign and placement capacity. support for advanced roles to support cancer and diagnostic innovation and promoting understanding of the value of Healthcare Science professions in expansion of delivery.

The plan covers core workforce expansion targets including radiography roles, cancer nurse specialists and others, including maximising the use of specific grants for regional benefit, and also our work to support innovative areas of care such as genomics. The breadth of the workforce in this area ranges from Assistant Practitioner to Consultant and training will include apprenticeships in addition to traditionally delivered programmes.

Programme objectives

Ensure we have a well-trained, resilient and cared for workforce, able to deliver an excellent Mental Health, Learning Disabilities and Autism Service across North East & Yorkshire.

Working together, we will respond effectively and efficiently to the pressures being faced right now and plan for the future. To do this, we will:

- Have an effective regional workforce plan to ensure a sufficient supply of the right skills with a workforce who is diverse and reflective of our communities
- Ensure our workforce can access clear career pathways and development opportunities, achieved through engagement and partnership working with the local HEI's
- Work collaboratively with local authorities, voluntary and community sectors, Skills for Care and ICS Teams to enable transformation and new ways of working.

Our programme plan is in two pillars, focusing on the distinct workforce needs of Mental Health and Learning Disability and Autism services, relating to two separately delivered NHSE/I regional programmes. Our workforce governance is joint across both areas, supporting effective oversight and shared learning.

| Workstreams an | nd projects 2022/23 | | | |

| Programme | Programme Laura Serrant, Regional Head of Nursing, <u>laura.serrant@hee.nhs.uk</u> | | | | |
| sponsor | | | | | |
| Programme | Michelle Bamforth (MB), Regional Deputy Head of Nursing, | | | | |
| team | michelle.bamforth@hee.nhs.uk | | | | |
| | Claire Arditto (CA), Regional Head of AHP, <u>claire.arditto@hee.nhs.uk</u> | | | | |

Programme objectives

The NMAHP programme in 2022/23 will focus on contributing to professional growth targets including 50k programme, Training Nursing Associate (TNA) programme, midwifery and AHP professions with specific focus on Diagnostic Radiography (DRad), Operating Department Practitioner (ODP), Podiatry, Occupational Therapist (OT) in Social Care and the support worker workforce. We will do this by managing domestic supply routes including addressing attrition in training. Focusing on a multi-professional workforce, and underpinning interdisciplinary training and upskilling, growing and promoting the contribution of nursing associates and supporting return to practice across all groups.

In addition, and in line with the 2022/23 priorities and operational planning guidance for the NHS we will support systems to develop and deliver their workforce plans by:

- providing NMAHP professional and strategic expertise across HEE and NHSE/I functions and work programmes, delivered at both Regional, ICS and local level.
- actively support the delivery of sufficient high quality, practice-based learning opportunities to enable students to qualify and register as close to their initial expected date as possible.
- accelerate the introduction of new roles, such as Apprenticeships, Enhanced Care Practitioners (ECP) and TNA/NA in line with national plans
- support the development of the Nursing and AHP Additional Roles Reimbursement Scheme (ARRS) roles in Primary Care (PC)
- promote and support initiatives to expand workforce integration for Nursing and AHP roles in health and Social Care (SC) settings (Joining Up Care for People Places and Populations White Paper-DHSC Feb 2022 (LINK).

| | Clinical Leads: Primary Care Dean (Head of Primary Care School), HEE YH (tbc) Primary Care Dean (Head of Primary Care School) HEE NENC justin.burdon@hee.nhs.uk |

Programme objectives

This broad programme includes support to eye care, general practice, oral health, palliative and end of life care, pharmacy, social care including unpaid carers and volunteers and urgent and emergency care. Our approach to this workforce challenge is multi-professional and system wide, seeking to innovate and share workforce solutions among ICS partners and across sectors.

Working with the NHSE/I Primary Care team, with Systems and with primary care providers we will:

- Work in partnership to make the most effective use of the resources available.
- Improve timely access to primary care maximising the impact of the investment in primary medical care and primary care networks (PCNs) to expand capacity, increase the number of appointments available and drive integrated working at neighbourhood and place level.
- Invest in the workforce with more people, includes additional roles reimbursement scheme (ARRS) to deliver 26,000 roles in primary care (20,500 FTE 22/23) to support the creation of multi-disciplinary teams and new ways of working any by strengthening the compassionate and inclusive culture needed to deliver outstanding care.
- Build community care capacity keeping patients safe and offering the right care, at the right time in the right setting. Supported by creating equivalent of 5,000 additional beds, through expansion of virtual ward models.

Programme objectives

Through this programme we aim to proactively enable workforce transformation to happen at region, System, programme and place levels. We work with and through the region's four Integrated Care Boards, promoting partnership, cooperation and collaboration in line with our corporate foundations for success. Projects within the programme will deliver practical enablers to workforce transformation, covering future visioning, workforce planning, facilitating tangible workforce change making best use of all available NEY resources, and evaluating impact. Our work to support digital transformation through workforce transformation and with workforce development actions is also captured here.

Programme objectives

Through this programme we aim to maintain, design and deliver exceptional education that meets current and future innovative system need, with a focus on responding to prioritised System need and broad participation.

Our regional Advanced Clinical Practice Faculty works with System-level Faculties to grow the capacity of the region's Advanced Practice workforce, ensuring that new capability is embedded in local delivery. Promotion and embedding of new roles are also a key part of this work.

Our Apprenticeship Hub similarly works with System-level apprenticeship leadership capacity to help the region deliver against the Talent for Care Strategy, in relation to Get In, Get On, Go Further. Through this work we identify how existing and new apprenticeships can enhance workforce capability and support widened access to health and care careers.

Working together across multiple functions, we will ensure innovation of placements to enable access for learners and maximise opportunities to effectively grown the workforce.

Programme objectives

This programme encompasses our actions to support and value our own workforce and to make sure HEE is the Best Place to Work. We aim to address and improve team culture, diversity and inclusion, wellbeing, and to support colleagues to learn, develop and achieve. We gather insight from a range of sources including staff surveys, 'We are HEE workshops' and RD webinars and apply this in our workstreams. This programme operates under the umbrella of the national Best Place to Work programme and is linked to the Change Hub, Health and Wellbeing Forum and the OD leads network. In 2022/23 as we head into a period of organisational transition, this programme will include regional activities to support our teams through change.

Workstreams and projects 2022/23 Kev Timeframe Workstream Projects Lead partners ST 1 Promoting and Continuing implementation of the NEY-based Ongoing protecting health regional HWB strategy with a focus colleagues: throughout 2022/23 and wellbeing on maintaining HWB through HWB leads in (HWB) organisational transition and NHSE/I NEY change – including influencing and building on team HWB SWOTs and action plans; updating and promoting the NEY HWB Hub. Red, amber green rating in this table refers to the deliverability of this METIP plan only, not the status of overall current supply. In addition to the above: a separate nationally defined commissioning programme for Spending Review priorities including mental health will be aligned to regions in year; regional programmes are block commissioned providing Cytology and Public Health Practitioner training. This table is an extract from a full report on METIP 2022/23 which can be accessed <u>here</u>.

Annex 2: 2022/23 Budget

| Budget | Budget Holder | £ million | What the budget pays for |
|---|--------------------------------|-----------|---|
